

Invest to do well... and good

THE ORAH FUND

FUND DESCRIPTION

The ORAH Fund is a fund of funds aiming to produce risk-adjusted returns in excess of a composite benchmark comprising 50% of the MSCI World and 50% of the ASX 300 Index.

To achieve the Fund's objectives, the investment manager seeks to identify a set of specialist Underlying Funds that possess varied investment styles and strategies. This diversification is expected to result in reduced volatility and more stable returns over time. The Fund's investments are geographically diversified with the Underlying Funds investing in assets held both domestically and abroad.

The ORAH Fund was established in order to benefit charities supporting Jewish related causes, and all management and performance fees charged by the ORAH Fund are donated to charity. Importantly, the donations do not dilute the investment returns to unitholders. This is due to the philanthropy of the managers of the Underlying Funds who do not charge management or performance fees for their services.

PERFORMANCE SUMMARY

The Fund generated a return of -3.2% (Class A) for the month compared to the benchmark which returned -1.8% over the same period.

Global equities were largely flat over May, with the MSCI World returning -0.2% in local currency terms (and -0.9% in AUD terms). This masked a significant intra-month period of realised volatility in which, for example, the S&P 500's high was 4,308 and low was 3,810 (a 13% difference). The first half of May saw investors grapple with macroeconomic risks including the war in Ukraine, China's COVID restrictions, and continued central bank hawkishness, all of which exacerbated supply chain tightness and led to Q2 growth concerns, earnings shocks, and lower corporate guidance. The second half of the month saw a strong reversal in equity markets as the US Federal Reserve provided more mixed (dovish) commentary, initial evidence of easing inflation and financial conditions emerged, and China began its reopening efforts.

PERFORMANCE HIGHLIGHT

This month we would like to highlight the Pengana Global Small Companies Fund, which uses a value-oriented approach to identify and invest in quality businesses that create significant value but are mispriced, overlooked, or out of favour. With access to a vast investment universe of over 50,000 listed global small to mid-cap companies across the globe, the fund aims to be well-diversified across geographies and industries.
