## THE ORAH FUND

### FUND DESCRIPTION

**The ORAH Fund is a fund of funds aiming to produce risk-adjusted returns in excess of a composite benchmark comprising 50% of the MSCI World and 50% of the ASX 300 Index.**

To achieve the Fund's objectives, the investment manager seeks to identify a set of specialist Underlying Funds that possess varied investment styles and strategies. This diversification is expected to result in reduced volatility and more stable returns over time. The Fund's investments are geographically diversified with the Underlying Funds investing in assets held both domestically and abroad.

The ORAH Fund was established in order to benefit charities supporting Jewish related causes, and all management and performance fees charged by the ORAH Fund are donated to charity. Importantly, the donations do not dilute the investment returns to unitholders. This is due to the philanthropy of the managers of the Underlying Funds who do not charge management or performance fees for their services.

PERFORMANCE  
SUMMARY

The Fund returned +5.1% versus +6.2% for the benchmark in July. Economic data released over the month pointed to a slowing global economy. Flash PMI surveys showed manufacturing activity losing momentum, the US Federal Reserve delivered a 0.75% rate hike, the US moved into a technical recession (with Q2 GDP contracting by -0.9% p.a.), and the IMF again downgraded its global growth outlook and increased inflation forecasts worldwide. While labour markets have remained strong, real wage growth has remained negative.

Despite the overall weaker growth backdrop, July was a risk-on month, driven by the market's idea that policy tightening may fade, with predictions of interest rate cuts by the US Federal Reserve in 2023. This environment benefited growth stocks heavily across the world, with the MSCI World Growth Index recovering some of this year's losses by rising +11.5% (in USD terms).

PERFORMANCE  
HIGHLIGHT

Within our portfolio the Hyperion Global Growth Companies Fund, which invests via a highly concentrated portfolio of 15-30 high-quality and growth-oriented companies with predictable medium- to long-term earnings streams, benefited strongly. The fund's portfolio is the result of over 10 years of research into global businesses, and aims to deliver outperformance by protecting and growing investors' capital over the long-term.
