## THE ORAH FUND

### FUND DESCRIPTION

**The ORAH Fund is a fund of funds aiming to produce risk-adjusted returns in excess of a composite benchmark comprising 50% of the MSCI World and 50% of the ASX 300 Index.**

To achieve the Fund's objectives, the investment manager seeks to identify a set of specialist Underlying Funds that possess varied investment styles and strategies. This diversification is expected to result in reduced volatility and more stable returns over time. The Fund's investments are geographically diversified with the Underlying Funds investing in assets held both domestically and abroad.

The ORAH Fund was established in order to benefit charities supporting Jewish related causes, and all management and performance fees charged by the ORAH Fund are donated to charity. Importantly, the donations do not dilute the investment returns to unitholders. This is due to the philanthropy of the managers of the Underlying Funds who do not charge management or performance fees for their services.

PERFORMANCE  
SUMMARY

The Fund returned 2.3% for the month, benefitting from strong returns in the market. Ongoing concerns around continued central bank tightening and increasing inflation dominated investors' minds at the start of November. While steep rate hikes eventuated as expected (with both the US Federal Reserve and the Bank of England raising rates by 0.75%), investor sentiment improved following the release of October inflation figures for the US. The reported increase of 7.7% YoY came in below consensus providing optimism around peaking inflation. China saw the reduction of certain COVID control measures following public backlash across multiple cities and the end of the Party Congress. With the end of its zero COVID policy and reopening gaining traction, the CSI 300 (China Securities Index 300) ended the month up 8.8%.

PERFORMANCE  
HIGHLIGHT

November saw strong outperformance from the L1 Capital Long Short Fund as a result of stock selection and tailwinds from sentiment surrounding China's reopening. The fund is managed on an absolute return basis and offers investors a highly diversified portfolio of long and short positions based on fundamental bottom-up research.
